Seeds...

Seeds are not—like nuts and bolts—inanimate—but are living objects in a dormant state. It is not wise to buy CHEAP SEEDS and jeopardize your chances of success. Earn the best dividend on your outlay by purchasing PEDIGREED strains. As in Animals, so in Plants—BREED TELLS. You can buy Cheaper seeds than Burnett's but not Better. The choice is yours—CHEAPEST OR BEST.

Make plans now for a bigger and better vegetable garden for the year 1941. We all remember our experience in the last War when the great problem at home was the supply of fresh vegetables. Will this condition again prevail? Rumors are heard at this time of a war garden campaign by our government. War gardens may be necessary in the current emergency even if we do not take an active part in the War.

WE MAKE NO CHARGE FOR DELIVERY OF ANY GRASS SEEDS

BURNETT'S Lawn Grass Seed MIXTURES

The Satisfaction of a Perfect Lawn

A fine lawn is obtained by the careful and exact fulfillment of three fundamental requirements. Preparation of the seed bed, the use of good grass seed and the proper maintenance of the turf once established. These three factors are of equal importance, and failure to meet the requirements of any of these will make the efforts expended on the other two of little avail. **Burnett Bros. Inc.**, with a reputation of supplying grass seeds of the highest quality for a period of over thirty years, assume the responsibility of furnishing good seed.

HORMONE-TREATED LAWN GRASS SEED

Plants from Hormone-Treated Grass Seed have nearly three times the root strength of plants from untreated seed

Outstanding among the scientific discoveries of recent years. Extensive experiments have shown that the Hormone Treatment of Grass Seeds will result in quicker germination and a marked increase in root growth.

result in quicker germination and a marked increase in root growth.

The production of this strong, extra vigorous root system (see illustration above) is of vital importance in making a new lawn or renovating an old lawn. The extra stimulant derived from Hormone Treatment is of particular value for late seedings, or where it is necessary to produce an established turf in a relatively short time.

HORMONE-TREATED available in all mixtures at 5c. per lb. additional to listed prices

BURNETT'S "Killarney" MIXTURE

Burnett's Lawn Grass Seed Mixture "Killarney" is composed of a combination of the finest imported and domestic grasses, the highest grades possible to procure, and specially adapted for this climate. This mixture is composed of all solid, recleaned seeds of the highest germination. Therefore, both owners of large estates and small homes requiring a permanent sod and everlasting lawn should by all means use this high-grade mixture. If the ground is properly prepared, we are certain "Killarney Mixture" will produce a turf of velvet.

BURNETT'S "Special" LAWN GRASS MIXTURE

The above mixture is made from our own formula, and composed of grasses specially adapted for the purposes of producing turf which retains its rich green color and velvety appearance throughout the entire summer and fall. In making up this high grade mixture we are careful to use only the very finest quality of all the most desirable, dwarf evergreen, **recleaned** grasses, free from chaff and weeds, which thrive well on any soil, thus ensuring a beautiful and permanent lawn.

SOIL-SOAKER HOSE

The new "seepage irrigation" method that soaks the soil thoroughly like an "all night rain." Puts the water where you want it and where it should be—on the ground—not up in the air to be wasted and carried away by high winds. Excellent for use in gardens and lawns, and around shrubs, trees, hedges, borders, Porous canvas is treated to resist mildew. Screws to faucet or water hose, replacing sprinkler, and is closed at far end. 12 ft. \$1.25, 18 ft. \$1.75, 30 ft. \$2.75, 50 ft. \$4.75.

BURNETT'S "SHADY PLACE" MIXTURE

When a lawn is much shaded, either in whole or in part, the shaded portions should be sown with Burnett's "Shady Place" Lawn Grass Mixture. which is a combination of fine, dwarf-growing evergreen varieties, which, in their wild or natural state, are to be found growing in the woods or other sheltered or shady places. Under or in the immediate neighborhood of large trees fertifizers should be applied liberally and frequently, for the trees absorb the fertilizer and impoverish the ground. Ground much shaded is very frequently sour, and if the drainage is defective it is apt to be covered with moss. In such cases lime raked in will sweeten the soil, but the moss should be first

removed. Lb. 80c., 5 lbs. \$3.75, 12½ lbs. \$8.50, 25 lbs. \$16.00, 100 lbs. \$60.00.

PERMANENT TURF

Will produce the most permanent lawn possible. In sun or shadegood or poor soil. Prepared especially for Chinch Bug infested areas

Many beautiful lawns throughout certain areas of the eastern coast of the United States and elsewhere have been completely destroyed as a result of the extensive ravages of a recent lawn pest, the Chinch Bug. This bug is of the sucking insect type and does its damage to lawns by piercing the grass blades and shoots near the soil level and sucking out the juices of the grass.

Certain grasses have been found to be highly resistant to the attacks of this insect and it is a careful blending of these grasses that make up our "Permanent Turf."

Permanent Turf (no Clover), 12½ lbs. \$12.00, 25 lbs. \$22.00, 100 lbs. \$78.00, 500 lbs. \$350.00.

Burnett's Pasture Mixture

STANDARD MIXTURES FOR ALL PURPOSES

Our Permanent Pasture Hay and Meadow Mixtures are composed of varieties of grasses best adapted for producing an abundant and nutritious food for stock. Nothing but the best recleaned seeds are used, consequently it does not take so large a quantity per acre as that generally used when poor quality mixtures are sown.

We recommend 50 to 75 lbs. to one acre, which may be sown either in the spring or fall.

MIXTURE NO. 1. For good soils, well drained and of medium texture.

MIXTURE NO. 2. For poor quality soils, thin and generally dry.

MIXTURE NO. 3. For moist soils, comparatively rich in plant food and humus. Usually heavy in texture.

MIXTURE NO. 4. For shaded woodlands, fields and orchards.

MIXTURE No. 5. Entirely composed of permanent Hay grasses for the production of a bumper hay crop.

MIXTURE No. 6. A formula consisting of purely permanent Pasture grasses which furnish abundant and continuous grazing.

MIXTURE NO. 7. Hay and pasture grasses with Kentish Wild White Clover. 25 lbs. \$11.25, 100 lbs. \$42.50.

MIXTURE NO. 8. Timothy-Red Top-Clover mixture. pastures and low cost hay production. 10 lbs. \$3.00, 100 lbs. \$25.00.

MIXTURE NO. 9. Mixed Clovers only. For permanent pastures. 10 lbs. \$6.00, 25 lbs. \$13.50, 100 lbs. \$47.50.

When seeding with Nos. 1, 2, 3 and 4, the addition of 10 lbs. of Mixed Clover (No. 9) per acre, sown separately, is advisable.

> Any of the above mixtures, unless noted: 25 lbs. \$10.75, 100 lbs. \$40.00, 500 lbs. \$175.00

BURNETT'S MIXTURES FOR SPORTS AREAS

We have made a specialty of Fine Grass Seed Mixtures for many years, suitable for golf courses and various athletic purposes and are direct importers of the various European grasses and handle largely the domestic varieties necessary for the formation of correct formulas to cope successfully with the many different conditions of soil, location and climate.

May be mown closely; resists constant wear in one spot. 5 lbs. \$3.75, 25 lbs. \$16.00, 100 lbs. \$60.00.

THE POSITIVE CRAB GRASS CONTROL

Heavy growth and every seed of Crab Grass in the lawn are completely destroyed by the "Flame-Sprayer." Eliminates turning over or removing any of the soil.

THE FLAME SPRAYER WEED BURNER

The Flame Sprayer produces a wide, flat flame of intense heat (2000 degrees F.) Burns kerosene, range oil or 34-42 gravity distillate. Consumes about 1 gallon of fuel per hour. Equipped with regulating valve and pressure gauge.

The Flame sprayer does 1001 jobs, speedily, economically and efficiently A few of its other uses:

Burning weeds in driveways, walks, tennis courts, drainage ditches. Destroying caterpillars, chinch bugs, locusts, grasshoppers, etc.

Disinfecting stables, dog kennels,

poultry houses, etc.

Melting ice and snow from walks,
gutters, garage doors, etc.

Preheating engines and other parts

of farm machinery. Heating wax, feed water for stock, maple sugar, etc.

Thawing pipes, pumps, switches, locks, etc.

Charring fench posts—Heating to split rocks. Destroying diseased plants—Back

Preheating for welding—Incinerator

firing. Burning stumps—Sterilizing soil.

1941

THOSE MARKED (ALL AMERICA SELECTIONS

1941

All gardening enthusiasts are more or less interested in something new in the floral world, and for this reason we keep in touch with all new introductions as they appear from year to year. These novelties and specialties have been selected by us as having a good claim to merit and are well worthy of a trial.

Each year a group of horticultural experts makes a careful study of new floral novelties produced by plant breeders. The final decision of this committee on each year's novelties is known as the All America Selections for that year. The following list

is the selection of the newest in flowers for 1941.

ASTER, Princess Bonnie

AGERATUM

Midget Blue. Truest and most compact dwarf Ageratum so far seen. 3 to 4 in. low compact plants covered with small, true Pkt. 25c., 1/16 oz. azure-blue flowers.

SWEET ALYSSUM

Violet Queen (New). A dwarf compact variety with flowers tinted a beautiful violet. Especially well suited for borders and bedding purposes. Pkt. 20c., 1/4 oz. 75c. (Illustrated in color, see page 19.)

ANTIRRHINUM (Snapdragon)

Large-Flowered Giants (Rust-Resistant)

Rosalie. Entirely new color of rich deep rose with an underlying tone of topaz or amber. An all-purpose Snap for both bedding and cutting. Pkt. 35c.

BURNETT'S BEAUTIFUL ASTERS

The introduction of a Wilt-resistant strain of Asters of recent years has helped tremendously in restoring this beautiful flower to popular vor as a garden plant. Up until the time of the origination of this resistant strain, garden enthusiasts were becoming discouraged trying to favor as a garden plant. grow Asters outdoors with the wilt-disease so prevalent. The appearance of this new strain has again awakened interest in the culture of Asters.

For best results the ground cannot be too richly prepared. Plants from seed sown in the open ground in May will bloom in September and October. For July and August flowers, sow in March or April in cold frames or hotbeds. We especially recommend the following as being the best for cutting and general garden use.

LATE GIANT BRANCHING Wilt-resistant

GIANT SPENCER SWEET PEAS

Sweet Peas are and always have been one of our floral specialties. As climbing vines for trellises, or as an individual row across the garden, they make a wonderful showing. Every year our lists of varieties are revised to include the best type of each color, newer varieties supplanting those of less merit.

The following selection comprises the most popular varieties in their respective colors:

NEW INTERMEDIATE SPRING FLOWERING

A new class blooming later than the Winter and earlier than the Summer flowering. Very much suited for Mid-winter sowing in the greenhouse to produce flowers for early April picking. Their vigor of growth, ability to stand the hot weather and the unusually long and stout stems make them adaptable for Summer planting outdoors where they will bloom in early Fall.

Clear Blue, True Lavender, Rose Pink Each, pkt. 25c., oz. \$1.00

HARDY GARDEN LILIES

The various types of Hardy Lilies are unequaled by any other plant in their unique combination of beauty, gracefulness, and stately magnificence; yet they are entirely unknown in many gardens. Their culture has been entirely too much neglected, but each year as their merits become better known, they increase in popularity. Contrary to general opinion, most Lilies are robust, and when once planted should not be disturbed. In cold climates the bulbs should be protected from freezing during the Winter by a heavy covering of leaves, hay, or straw.

"It would seem that there is no question as to the permanence of lead pencil markings on these labels, and their attractive form and color have been admired by many visitors."

GEORGE H. HOLLISTER, Superintendent of Parks, City of Hartford, Conn.

. . . their color, shape, size, ease of preparation and permanent legibility make your Perfect Garden Labels the most satisfactory I've yet seen or used."

A. H. HERRICK, F.R.H.S., The Digest Gardener, Cambridge, Mass,

With an ordinary lead pencil write or print on the ample horizontal marking space of a **PERFECT GARDEN LABEL**. Set it in the ground near the plant you wish to mark. Put it in deep, so that only the marking space shows.

One year, two years, three years, four years afterward,—at any time—you will be able to read easily every character of your marking. In damp soil or dry, acid or alkaline, sun or shade, all weathers, all seasons your markings will be completely legible.

Previous markings can be readily erased at any time with a stiff pencil eraser and the label can be used again.

The marking space is large enough for three or four lines of writing or even display printing. In experimental gardens, notes may be added at any time. The under side of the marking space can be used for

extensive notes, or you can write on the shaft.

These labels are designed so that the shaft may be entirely buried, with the marking space just above the surface on an angle for convenient reading. Thus they do not interfere with weeding and cultivating.

If stepped on they do not break, but merely bend down and spring back when released.

The PERFECT GARDEN LABEL is inconspicuous. The beautiful cool gray green color blends with the soil, foliage and rocks. Only the marking space shows. If you wish the labels hidden they may be almost buried out of sight and lifted only for reading. The markings will be completely legible. A touch of the finger will clear away the soil from the smooth, clean, Duco-like surface. The only caution is not to rub too hard if the soil is quite wet.

These labels are safe for fall planting. Frost does not easily heave them out of the ground on account of the corrugated shaft. If your borders flood in the spring they will not float away from the plants marked as they are heavier than water.

PERFECT GARDEN LABEL IN YOUR GARDEN

Your plants will be safely and permanently identified.

You will preserve the elusive names of your named varieties.

Your valuable specimens will be insured against careless weeding and cultivating.

You will enjoy their convenience and simple method of marking.

They will not mar the beauty of your borders and rock gardens.

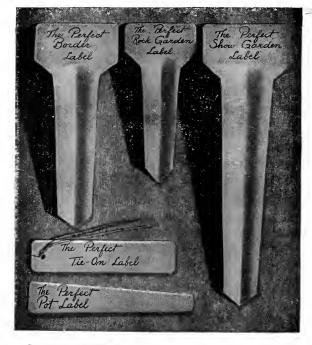

They can be erased and marked again.

They are economical because they are permanent.

A PERFECT GARDEN LABEL

FOR EVERY PURPOSE

All of the same beautiful and practical material

BORDER LABEL—An inconspicuous label for general use in perennial and annual borders. Often used in larger rock gardens,

ROCK GARDEN LABEL—Designed for small plants in rock gardens. Also useful in seed beds, cold frames, etc.

SHOW GARDEN LABEL—Ideal as a more conspicuous label for tall plants, vegetable rows, etc.

TIE-ON LABEL—For roses, shrubs, small trees, Dahlias and all purposes where a label of this type is required.

POT LABEL—For pots, seed flats, cold frames, greenhouse work, orchids, tiny rock plants and all uses requiring a small label.

MORE LIFE

3 TO 5 DAYS FOR YOUR CUT FLOWERS . .

Now you can prolong the life and beauty of roses and other cut flowers in your home! Just add Floralife

powder to the water and enjoy your cut flowers 3 to 5 days longer.

This scientific preparation keeps the water fresh and sweet and feeds the blooms with the proper food elements so that they actually grow and develop as they would in the garden.

FLORALIFE

- retards wilting even in warm rooms
- prevents fading in sunlight
- maintains fragrance
- no need to change water or to recut stems
- no need to put in cool place at night
- prevents stem decay
- supplies blooms with required food elements

Floralife is now being used by many leading florists in all their cut flower arrangements, hospital bouquets, and boxes of cut flowers. It is especially valuable for exhibition blooms at flower shows or wherever choice blooms are to be kept as long as possible.

For proof of Floralife benefits make an interesting test in your own home. Arrange some flowers in Floralife solution and others in plain water. Place both bouquets under severe conditions such as a warm and dry or drafty location in full sunlight. You will be amaze. I at the superior keeping qualities of the blooms in Floralife. The test is most convincing.

THE NEW HANDY PLANT-TIE

"Twist-ems" are dark green strong tapes with wire reinforcing that make perfect plant ties. No twine or raffia or shears needed. For annuals, perennials, shrubs, vines and vegetables, excellent for arranging flowers. For nurseries, estates or amateur gardeners.

Place 'Twist-ems' around stem and support

A TWIST OF THE WRIST

THE NEW HANDY PLANT-TIE

QUICK . . . "Twist-ems" save the tedious work of tying plants with twine or raffia and cutting each piece with a knife or shears. Simply put around the stem, twist and it is tied. PERMANENT . . . "Twist-ems" do not break or come loose. The wire running through the center of tape makes them unbreakable and they cannot come unfastened. Tape protects stem against injury.

ATTRACTIVE . . "Twist-ems" are deep green in color—exactly the same shade as the foliage of plants. They, therefore, blend in with the plantings and do not detract from the appearance of the garden.

CONVENIENT . . . "Twist-ems" make it unnecessary to carry with you shears, raffia, or twine, and tie and cut. A few "Twist-ems" in one's pocket are all that is needed.
